

## **Volunteer Opportunities for Mental Health Professionals**

The following are opportunities for Mental Health Professionals (Psychiatrist, LCSW, LCPC, Clinical Psychologist) who are currently licensed. Volunteers are asked to make a commitment of two (3 – 4 hour) shifts per month for one year and scheduling is flexible. Given a patient population that is primarily Hispanic and significantly Polish, the health center is in special need of bi-lingual volunteers.

### **Volunteer Counselors (LCSW, LCPC, Clinical Psychologist)**

Volunteer counselors provide short term therapy (6 – 12 sessions) in one on one counseling sessions to patients referred to and with interest in receiving counseling services at CommunityHealth.

### **Volunteer Psychiatrists:**

Volunteer Psychiatrists provide consultations, psychiatric evaluations, and conduct one-on-one patient visits. Psychiatrists will work in collaboration with the Coordinator of Social Services.
